

H1 2019 Results Presentation

24th July 2019

ALANTRA

I. Alantra continues with revenue and net profit growth in 2019 with increasing activity in both business divisions

H1 2019 Highlights

Net revenues reached €81.8 Mn (+16.4% vs. H1 2018) generating a net profit of €12.1 Mn (+32.6% vs. H1 2018) in the fee business

- Investment Banking revenues have grown by 29.6%, driven by a strong performance of the corporate finance division and specially of the International Credit Portfolio Advisory business (ACPAI). Asset Management revenues decreased by 8.3%, due to lower performance fees (-18.5%)
- Operating expenses have grown by 42.1% to €75.3 Mn, due to (i) an increase of fixed personnel expenses (+€8.0 Mn) related to the expansion of the Group and higher variable remuneration (+€6.9 Mn) in the IB division linked to better performance and (ii) an increase related to higher amortization (according to the new NIIF16 standards) and impairment costs (+€6.8 Mn)

In addition to the fee business, the Group has generated profits from portfolio divestments (€0.6 Mn) and extraordinary results of €8.9 Mn resulting in a total net profit of €21.7 Mn (+57.6% vs H1 2018)

- The extraordinary results are mainly related to the closing of the transaction by which Mutua Madrileña becomes a majority shareholder in Alantra Wealth Management, acquiring a c.25% stake from Alantra and a c.25% stake from the executive team
- As a consequence of the transaction, Alantra will from now onwards consolidate Alantra Wealth Management under the equity method and has therefore adjusted its remaining stake to market value in its Balance Sheet

Investment Banking highlights: (i) Alantra named 'European Corporate Finance House of the Year 2019', (iii) acquisition of urbanData Analytics (ii) 83 announced deals 2019YTD¹

- Named 'European Corporate Finance House of the Year 2019' by Real Deals
- Acquired a majority stake in urbanData Analytics, a technology company operating in the PropTech segment to expand Alantra's CPA service offering
- Advised on 83 deals in 2019YTD¹, of which 47% were M&A transactions

Asset Management highlights: (i) closing of ACP transaction, (ii) launch of venture capital activity and (iii) growth in AUM

- Completed the first phase of the acquisition of a strategic stake in Access Capital Partners (24.49%)
- Entered venture capital via strategic partnership with Asabys Partners, acquiring a 35% stake
- Increased total fee-earning AUM from the direct investment business by €327 Mn over the last twelve months reaching €2.1Bn

III. Glossary (i)

Identified business segments

“Business Segments” refer to each operating segment or component identified and classified as such by Alantra that (a) engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the group); (b) whose operating results are regularly reviewed by the entity’s chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance; and (c) for which discrete financial information is available.

“Investment Banking”. The identified Alantra business segment which (in keeping with the definition provided in the Prospectus filed with the CNMV on 28 July 2015 in conjunction with the application to have the new shares issued as a result of the Merger admitted to trading, hereinafter, the "Prospectus") provides financial advisory services to companies or entities on corporate transactions (corporate finance and M&A) and equity research and brokerage services to institutional investors.

“Asset Management”. The identified Alantra business segment which, in accordance with the information provided in the Prospectus, consists of the management of and provision of advice in relation to various classes of assets for institutional investors, high net worth individuals/family offices and other professional investors through specialist investment funds or customer investment portfolios.

“Corporate”. The identified Alantra business segment which encompasses the universe of revenues and expenses corresponding to Alantra's governance and development structure (corporate governance, strategic management, corporate and business development and corporate services such accounting and financial reporting, risk management and control, human resource management and legal services, among others) and which, either because they relate to the Group parent - as a listed entity - or the management of the Group as a whole, are not directly attributable to the Investment Banking, Asset Management or Portfolio segments. The Corporate segment also includes the invoicing of services related to Alantra Group companies that are associates, i.e., not fully consolidated. In light of Alantra's ongoing growth at both the corporate and business levels, the significance of the services encompassed by the Corporate area justifies its classification as an independent segment.

“Portfolio”. The identified Alantra business segment which is defined, in keeping with that stated in the Prospectus, as the activity consisting of the pursuit of capital gains by taking ownership interests in companies, funds or investment vehicles managed by the Alantra Group's asset management teams and subsequently selling those interests. The current portfolio originated in two ways: (i) the universe of companies invested in by the Company in its former capacity - prior to the Merger - as a private equity firm and which at the date of the Merger had not yet been disposed of or sold; and (ii) Alantra's investments in vehicles managed or advised on by the Group.

“Other”. It is defined, by default, as the host of items that do not correspond to any of the business segments (i.e., that are not part of either the Investment Banking, Asset Management, Corporate or Portfolio segments).

III. Glossary (ii)

"Fee Business" is defined as the group or aggregate of the Investment Banking, Asset Management and Corporate segments which, as a whole, are referred to as the service provision businesses, whether those services be financial advisory or management, whose revenues materialise in the form of fees and whose expenses are those necessary for their pursuit and development, mainly comprising staff costs. The following is specifically carved out of the Fee Business: losses or gains deriving from the Group parent's investments in the companies that perform the aforementioned activities (such as, for example, gains unlocked on the sale of investments in companies or businesses, goodwill impairment charges or foreign currency gains or losses); those losses or gains are included under segment termed Other.

- The decision to allocate 100% of the activity encompassed by the Corporate segment to the Fee Business reflects the fact that the vast majority of the time and/or investment of the resources included under Corporate are devoted to managing the growth and complexity emanating from the Investment Banking and Asset Management segments. This concept is all the more relevant as it underpins several of the alternative performance measures (APMs) used.

"Recurring Business". The group or aggregate of segments comprising the Fee Business (Investment Banking, Asset Management, Corporate) plus the Portfolio segment.

Alternative performance measures

"Alternative performance measures" or "APMs" A measure of the past or future financial performance, financial situation or cash flows of a company other than the financial measures defined or described in the applicable financial reporting framework.

"Fee Business Net Profit". The profit generated from the provision of advisory or management services under the umbrella of the Fee Businesses (i.e., that corresponding to the Investment Banking, Asset Management and Corporate segments), whose revenues materialise in the form of fees and whose expenses are those necessary for their pursuit and development, mainly comprising staff costs.

- Fee Business Net Profit is calculated as the sum of profit attributable to owners of the parent corresponding to the above three segments.
- The markedly different nature of Alantra's two businesses (Fee Business and Portfolio) justifies the breakdown of Fee Business Net Profit attributable to owners of the parent in the Company's public financial disclosures.

"Portfolio Net Profit". The profit deriving from the investment in and subsequent disposal of shareholdings in companies, funds or other investment vehicles managed by the Alantra Group.

- Portfolio Net Profit is equal to the profit attributable to owners of the parent corresponding to the Portfolio segment.
- The markedly different nature of Alantra's two businesses (Fee Business and Portfolio) justifies the breakdown of Portfolio Net Profit attributable to owners of the parent in the Company's public financial disclosures.

III. Glossary (iii)

“Recurring Net Profit”. The profit derived from the Group's recurring or ordinary activities, i.e., that generated by the Investment Banking, Asset Management and Portfolio segments.

- Recurring Net Profit is the sum of Fee Business Net Profit and Portfolio Net Profit.
- Recurring Net Profit is an important indicator, in relation to net profit (or profit attributable to owners of the parent), insofar as it helps users assess what part of the Group's bottom line is attributable to the recurring businesses and not extraordinary accounting entries.

“Financial Leverage”. This metric is defined as the aggregate borrowings provided to the Group by banks, credit institutions and similar entities to fund its business operations. This measure excludes amounts due to employees, suppliers, companies within its scope of consolidation or their shareholders. It also excludes obligations to banks, credit institutions or similar entities when these obligations are specifically secured by assets in the same amount.

- Financial Leverage is calculated as the sum of balance sheet items grouped under “Bank borrowings” that meet the criteria defined in this APM. Hence the 2,458 thousand euros registered in the liabilities of the consolidated balance sheet as of 30th June 2019 are excluded.
- Financial Leverage is a meaningful indicator of changes in the Group's consolidated balance sheet.

“Payout”. This metric is defined as the percentage of profits the Company pays out to its shareholders.

- It is calculated as the total sum distributed by the Company to its shareholders in respect of a given reporting period (whether in the form of a dividend or a distribution charged against reserves or the share premium account) and the consolidated net profit, attributable to the controlling company, generated during that same period
- The payout indicates the extent to which shareholder remuneration is financed from profit for the year (or for the reporting period in question).

“Dividend Yield”. The return earned by the Company's shareholders by means of the dividends they receive.

- The Dividend Yield is calculated as the ratio between the total per-share sum distributed by the Company to its shareholders in respect of a given reporting period (whether in the form of a dividend or a distribution charged against reserves or the share premium account) and the share price as of a given date (which date shall be that referenced when the AMP is disclosed).
- Shareholders earn a return in two ways: gains in the price of the shares they hold and the remuneration they receive in the form of distributed dividends, reserves or share premium accounts. The Dividend Yield is the APM or benchmark indicator for the latter source of shareholder returns.
