1. Group highlights

1. Executive summary

€177.9 Mn
Net revenues

- Proven resilience and delivery amidst a challenging market environment, reaching **€177.9 Mn** of net revenues (-17.0%)
- As anticipated in previous reports, Q2 and Q3 results were weaker than 2019 due to Covid-19 effects, while Q4 results were notably stronger and have partially offset the decrease vs. 2019 (+€66.0 Mn of net revenues in Q4)

€29.0 Mn
Attributable net profit

- Total operating expenses fell by 17.6% to €141.4 Mn, in line with net revenues, mainly driven by the decrease in variable retribution (-29.2%) as it is linked to performance and adjustments in certain businesses and other operating expenses
- Net profit attributable to the parent reached **€29.0 Mn** (-27.7%), of which **€29.3 Mn** (-22.4%) corresponds to the fee business, €1.4 Mn (-22.3%) to the portfolio and -€1.7 Mn (-414.9%) to other results

€163.8 Mn
Cash and cash equivalents
and liquid assets¹

- Further strengthened balance sheet as of 31st December 2020
 - €246.4 Mn of shareholders' equity attributable to the parent and no financial leverage
 - €163.8 Mn of cash and cash equivalents and liquid assets¹
 - €41.7 Mn portfolio of investments in products managed by the group

**Full pay-out of FY
2020 consolidated
profits**

III. Glossary (i)

Identified business segments

“Business Segments” refer to each operating segment or component identified and classified as such by Alantra that (a) engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the group); (b) whose operating results are regularly reviewed by the entity’s chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance; and (c) for which discrete financial information is available.

“Investment Banking”. The identified Alantra business segment provides financial advisory services to companies or entities on corporate transactions (corporate finance and M&A) and equity research and brokerage services to institutional investors.

“Credit Portfolio Advisory”. The identified Alantra business segment provides advisory services to financial institutions and institutional investors in credit, real estate and other asset portfolio transactions.

“Asset Management”. The identified Alantra business segment which, in accordance with the information provided in the Prospectus, consists of the management of and provision of advice in relation to various classes of assets for institutional investors, high net worth individuals/family offices and other professional investors through specialist investment funds or customer investment portfolios.

“Structure”. The identified Alantra business segment which encompasses the universe of revenues and expenses corresponding to Alantra's governance and development structure (corporate governance, strategic management, corporate and business development and corporate services such accounting and financial reporting, risk management and control, human resource management and legal services, among others) and which, either because they relate to the Group parent - as a listed entity - or the management of the Group as a whole, are not directly attributable to the Investment Banking, Credit Portfolio Advisory, Asset Management or Portfolio segments. The Structure segment also includes the invoicing of services related to Alantra Group companies that are associates, i.e., not fully consolidated. In light of Alantra's ongoing growth at both the corporate and business levels, the significance of the services encompassed by the Structure area justifies its classification as an independent segment.

“Portfolio”. The identified Alantra business segment which is defined as the activity consisting of the pursuit of capital gains by taking ownership interests in companies, funds or investment vehicles managed by the Alantra Group's asset management teams and subsequently selling those interests.

“Rest”. It is defined, by default, as the host of items that do not correspond to any of the business segments (i.e., that are not part of either the Investment Banking, Credit Portfolio Advisory, Asset Management, Structure or Portfolio segments).

III. Glossary (ii)

“Fee Business” is defined as the group or aggregate of the Investment Banking, Credit Portfolio Advisory, Asset Management and Structure segments which, as a whole, are referred to as the service provision businesses, whether those services be financial advisory or management, whose revenues materialise in the form of fees and whose expenses are those necessary for their pursuit and development, mainly comprising staff costs. The following is specifically carved out of the Fee Business: losses or gains deriving from the Group parent's investments in the companies that perform the aforementioned activities (such as, for example, gains unlocked on the sale of investments in companies or businesses, goodwill impairment charges or foreign currency gains or losses); those losses or gains are included under segment termed Rest.

- The decision to allocate 100% of the activity encompassed by the Structure segment to the Fee Business reflects the fact that the vast majority of the time and/or investment of the resources included under Structure are devoted to managing the growth and complexity emanating from the Investment Banking, Credit Portfolio Advisory and Asset Management segments. This concept is all the more relevant as it underpins several of the alternative performance measures (APMs) used.

“Recurring Business”. The group or aggregate of segments comprising the Fee Business (Investment Banking, Credit Portfolio Advisory, Asset Management, Structure) plus the Portfolio segment.

Alternative performance measures

“Alternative performance measures” or “APMs” A measure of the past or future financial performance, financial situation or cash flows of a company other than the financial measures defined or described in the applicable financial reporting framework.

“Fee Business Net Profit”. The profit generated from the provision of advisory or management services under the umbrella of the Fee Businesses (i.e., that corresponding to the Investment Banking, Credit Portfolio Advisory, Asset Management and Structure segments), whose revenues materialise in the form of fees and whose expenses are those necessary for their pursuit and development, mainly comprising staff costs.

- Fee Business Net Profit is calculated as the sum of profit attributable to owners of the parent corresponding to the above three segments.
- The markedly different nature of Alantra's two businesses (Fee Business and Portfolio) justifies the breakdown of Fee Business Net Profit attributable to owners of the parent in the Company's public financial disclosures.

“Portfolio Net Profit”. The profit deriving from the investment in and subsequent disposal of shareholdings in companies, funds or other investment vehicles managed by the Alantra Group.

- Portfolio Net Profit is equal to the profit attributable to owners of the parent corresponding to the Portfolio segment.
- The markedly different nature of Alantra's two businesses (Fee Business and Portfolio) justifies the breakdown of Portfolio Net Profit attributable to owners of the parent in the Company's public financial disclosures.

III. Glossary (iii)

“Recurring Net Profit”. The profit derived from the Group's recurring or ordinary activities, i.e., that generated by the Investment Banking, Credit Portfolio Advisory, Asset Management and Portfolio segments.

- Recurring Net Profit is the sum of Fee Business Net Profit and Portfolio Net Profit.
- Recurring Net Profit is an important indicator, in relation to net profit (or profit attributable to owners of the parent), insofar as it helps users assess what part of the Group's bottom line is attributable to the recurring businesses and not extraordinary accounting entries.

“Financial Leverage”. This metric is defined as the aggregate borrowings provided to the Group by banks, credit institutions and similar entities to fund its business operations. This measure excludes amounts due to employees, suppliers, companies within its scope of consolidation or their shareholders. It also excludes obligations to banks, credit institutions or similar entities when these obligations are specifically secured by assets in the same amount.

“Payout”. This metric is defined as the percentage of profits the Company pays out to its shareholders.

- It is calculated as the total sum distributed by the Company to its shareholders in respect of a given reporting period (whether in the form of a dividend or a distribution charged against reserves or the share premium account) and the consolidated net profit, attributable to the controlling company, generated during that same period
- The payout indicates the extent to which shareholder remuneration is financed from profit for the year (or for the reporting period in question).

“Dividend Yield”. The return earned by the Company's shareholders by means of the dividends they receive.

- The Dividend Yield is calculated as the ratio between the total per-share sum distributed by the Company to its shareholders in the last twelve months (whether in the form of a dividend or a distribution charged against reserves or the share premium account) and the average share price of the last month.
- Shareholders earn a return in two ways: gains in the price of the shares they hold and the remuneration they receive in the form of distributed dividends, reserves or share premium accounts. The Dividend Yield is the APM or benchmark indicator for the latter source of shareholder returns.
